Technology Transfer and Scientific Collaboration

Collaboration on the development of a linguistic framework app for managing the Ketogenic Diet, named 'Ketapp'.

The app was based on the analysis of best communicative practices in doctor–caregiver discourse, as found in major English-speaking foundations dealing with ketogenic dietary therapy for pharmaco-resistant epilepsy in pediatric patients.

Developed within the FAR 2015 project: 'Exploring Health Literacy. Communicative Genres in Liaising with Caregivers: The Case of the Ketogenic Diet', an interdisciplinary project involving the Department of Linguistic and Cultural Studies and the Department of Biomedical, Metabolic and Neurosciences – University of Modena and Reggio Emilia.
