

Emanuele Galligani was born in 1964. Graduated in Mathematics. Full professor of Numerical Analysis since 2003.

Since 1991 he has been at the University of Modena. Until 2012 he belonged to the Department of Mathematics and since 2012 to the “Enzo Ferrari” Engineering Department.

His teaching activity began in 1990 and mainly concerns courses in Numerical Computing and Computer Programming and Numerical Analysis.

His research activity began in 1989, is documented by over 60 publications in journals or conference proceedings and concerns the analysis of numerical methods for:

- systems of linear and nonlinear algebraic equations and eigenvalue problems;
- nonlinear programming and complementarity problems;
- nonlinear diffusion equations;
- stiff differential equations.
