Courses:

- "Care and organizational models in territorial care"
- "Teamworking and tutorship methodologies in professional networks"

Functional Assignment in Clinical Governance Ensuring Appropriateness of Care Pathways, Equity and Quality

AUSL di Modena – Modena, MO – 01/2021 to present

Supporting the Management in reviewing clinical-care processes and care pathways (PDTAs), aimed at translating scientific evidence into clinical practice and identifying innovative interventions with the greatest potential impact on effectiveness, safety and appropriateness of care, as well as on healthcare spending governance.

Use of the main Clinical Governance tools:

- Critical review of scientific literature;
- Clinical audits and monitoring programs on the effectiveness, safety and appropriateness of PDTAs, to identify areas needing intervention;
- Analysis of the determinants behind failure to meet appropriateness and effectiveness targets;
- Identification of indicators to assess the impact of corrective actions.

On behalf of the Regional Health Service, the Clinical Governance Service of AUSL di Modena carries out Health Technology Assessment activities and performs the technical-scientific evaluations needed to establish the comparative (clinical and organizational) effectiveness of innovative interventions of regional interest.

Nurse

AUSL di Modena – Modena, MO – 01/2020 – 12/2020

- Nurse with expertise in Palliative Care.
- Involved in managing home-based Palliative Care, providing nursing and care services with attention to patients and their families.
- Support to family members and caregivers, transferring skills to facilitate care management.
- Case Manager Nurse at the Modena Oncology Centre: coordination of social-health services for patients in Palliative Care.
- Design of care processes tailored to each patient during the hospital-to-territory continuity-of-care transition.

Nurse

Veneto Institute of Oncology – Padua, PD – 09/2017 – 01/2020

- Care of oncology patients; administration of chemotherapy and basic treatments; monitoring of vital signs.
- Diagnostic support via collection of blood, urine or sputum samples for laboratory testing.
