Relational skills and abilities

Throughout my career, I have been challenged by teamwork, communicating effectively to ensure proper performance of my work both in the clinic and on the ward. I have attended various Communication and Psychology courses to build empathy with patients and their families.

Since taking on the role of Coordinator, I have strengthened my commitment to strengthening team spirit and instilling in my colleagues the awareness of working in a team, with all the "cons" but especially the "pros."

Excellent leadership skills (I currently coordinate a multidisciplinary group of 12 professionals), communication, and interpersonal skills, including with other centers and multidisciplinary teams. I organize and design internal courses for the continuing education of TFCPC and clinic nurses, as well as liaise with external collaborators for refresher courses.

Teaching at the University of Modena and Reggio Emilia, in the Degree Course in Cardiocirculatory Pathophysiology Techniques and Cardiovascular Perfusion. Support for degree course students during their internships at our clinics.

Organizational skills and abilities

Management of daily logistics activities, work shift organization, and training through multidisciplinary staff training and supervision, adapting organizational and management methods to the specifics of the sector

and emerging healthcare needs, to maximize the effectiveness and efficiency of activities and resources.

Ability to develop protocols and procedures for the organization and management of care processes, and to resolve personnel management issues.

Excellent ability to work by objectives and processes.

Artistic skills and abilities

Good knowledge of Microsoft Office, Word, Excel, Power Point, Outlook, and Access.

Excellent ability to use major databases for scientific research.

Music, singing
