LEADERSHIP POSITIONS AT NATIONAL OR INTERNATIONAL CENTERS FOR TEACHING IN MINIMALLY INVASIVE SURGERY

01/07/2019 – 01/04/2022

From July 2019 to December 2021, Dr. Stefano Puliatti held the role of **Deputy Medical Director at Orsi Academy**. From the beginning of this professional experience, the candidate's scientific activity has focused on training applied to robotic surgery. In particular, together with Prof. A. Gallagher (Full Professor at the University of Cork, expert psychologist in training) and Prof. A. Mottrie, the candidate contributed to the development of a new training methodology, proficiency-based progression training, and applied it to training in robotic surgery. Several publications have already been made, including:

- **Puliatti S**, Amato M, Mazzone E, Rosiello G, De Groote R, Piazza P, Sarchi L, Farinha R, Mottrie A, Gallagher AG. RESPONSIBILITIES FOR SCIENTIFIC STUDIES AND RESEARCH CONDUCTED BY QUALIFIED PUBLIC OR PRIVATE INSTITUTIONS

Osset Trial

Dr. Stefano Puliatti serves as the principal investigator for a randomized controlled prospective trial titled "Orsi Surgical Skills E-learning Trial (OSSET)." This trial has been entrusted to Dr. Puliatti by Orsi Academy, Melle, Belgium, a prominent institution specializing in minimally invasive surgery training. The trial is registered on [ClinicalTrials.gov](https://clinicaltrials.gov) under Identifier: NCT04541615 (<https://clinicaltrials.gov/ct2/show/NCT04541615>). Please find attached the complete trial description document on [ClinicalTrials.gov](https://clinicaltrials.gov). Below are the key details and a brief description of the study:

Locations: Belgium, Orsi Academy, Melle, Oost-Vlaanderen, Belgium, 9090.
Sponsors and Collaborators: Orsi Academy.

Investigators: Principal Investigator: Dr. Stefano Puliatti.

Brief Study Description: The training of robotic surgical procedural skills has faced challenges due to changes in work practices and safety concerns related to training. Simulation-based training in surgery and procedural medicine has been shown to replace the early part of the learning curve. However, training in skills laboratories is costly due to equipment and supervision requirements. In this study, the investigators will assess the economic impact of proficiency-based progression (PBP) e-learning training before training in the skills laboratory. Forty-eight trainees will be randomly assigned to one of four groups: Group 1 (n=12) will receive apprenticeship-type training; Group 2 (n=12) will receive traditional face-to-face lectures on robotic surgical training tasks; Group 3 (n=12) will undergo e-learning training followed by skills laboratory training on the same task; Group 4 (n=12) will complete the same e-learning curriculum as Group 3 but must achieve a predefined proficiency benchmark comparable to experienced robotic surgeons.

Proteus Trial

Dr. Stefano Puliatti serves as a Sub-Investigator in the PROTEUS trial (56021927PCR3011) starting from July 13, 2021, with the following responsibilities:

- Obtain informed consent and confirm eligibility
- Manage patient visits as per the clinical protocol requirements
- Manage IP
- Manage and update systems
- Manage vendor requests
- Process and manage biological samples
